RDMO

# Research Data Management Organiser

Jochen Klar

Leibniz-Institut für Astrophysik Potsdam (AIP)

jklar@aip.de, @jochenklar

RDMO is a tool to support the systematic **planning**, **organisation** and **implementation** of research data management throughout the course of a project.

An additional feature is the output of a **data management plan** in the form of a text document.

Project RDMO

Team

Partner

Why RDMO?

Organizer instead of plan

- Organize the data management over the whole lifetime of a project and beyond

- Engage and collaborate with all stakeholders

Local instead of central

- Full customization of the content
  - disciplinary context
  - institutional environment
- Easily deployable for universities or infrastructure providers
- Supports custom styling and *coorporate identity*

Get involved!
